SUMMARY

Data Scientist, AI/ML Engineer, and Business Analyst with a B.S. in Data Science (GPA 3.4, Dean's List) and 2+ years of professional experience building production AI systems, LLM agent platforms, data pipelines, and business intelligence solutions. Proficient in Python, SQL, R, Java, and C++ with hands-on expertise in LangChain, AutoGen, CrewAI, RAG pipelines, MCP servers, ETL/ELT development, Snowflake, Databricks, AWS/Azure/GCP, Power BI, and Tableau. Experienced translating business requirements into technical solutions, eliciting and documenting requirements, and communicating data-driven insights to executive and cross-functional stakeholders. Proven ability to deploy end-to-end AI services, manage data infrastructure, and drive ~20% operational efficiency improvement. Available to relocate anywhere in the US immediately.

EDUCATION

University of Toledo — B.S. Data Science | Minor: Computer Science | GPA: 3.4/4.0 | Dean's List | Aug 2022 – Apr 2026

Relevant Coursework: Machine Learning & Deep Learning, LLM Agent Systems, Data Engineering & ETL Pipelines, Business Analysis & Requirements Engineering, Statistical Analysis (R, SAS, Python), Cloud Platforms (AWS/Azure/GCP), Database Systems (SQL, PostgreSQL, MongoDB), Data Visualization (Power BI, Tableau), GIS (ArcGIS Pro, ArcMap), Software Engineering, Financial Analytics

TECHNICAL SKILLS

AI/ML & GenAI: LangChain, LangGraph, AutoGen, CrewAI, Semantic Kernel, LlamaIndex, MCP Servers, Claude Code, RAG Pipelines, FAISS, Pinecone, Prompt Engineering, PyTorch, Scikit-learn, HuggingFace, LLM APIs (OpenAI, Claude, Gemini), n8n, Agentic AI Frameworks

Data Engineering & Pipelines: ETL/ELT Pipeline Development, Apache Airflow, Apache Spark/PySpark, dbt, Kafka, Snowflake, Databricks (Delta Lake), Azure Data Factory, Google BigQuery, AWS Redshift, Data Quality & Monitoring, OpenTelemetry, Prometheus/Grafana

Programming: Python (Pandas, NumPy, SciPy, Scikit-learn, FastAPI, Flask, SQLAlchemy), SQL (Advanced), R, Java, JavaScript/TypeScript, C++, Go, SAS, MATLAB, Bash, Git/GitHub, CI/CD (GitHub Actions, Azure DevOps), Docker, Kubernetes, Terraform

Business Analysis & BI: Requirements Elicitation & Documentation, User Stories & Acceptance Criteria, SDLC, UAT, Business Process Analysis, Power BI (DAX, Power Query), Tableau, Excel (Advanced), Stakeholder Communication, Agile Delivery, Jira, Visio, Microsoft Project

Cloud & Infrastructure: AWS (S3, EC2, EKS, SageMaker, Redshift), Azure (Data Factory, AI Studio, AKS, Key Vault), GCP (BigQuery, Vertex AI, GCS, Cloud Composer), Docker, Kubernetes, Helm, Terraform, GitHub Actions

Domain & Enterprise: HL7/FHIR, EHR/EMR (Epic), PACS/AGFA, HIPAA, PeopleSoft, SAP, Salesforce, Workday, Oracle JD Edwards, ServiceNow, ArcGIS Pro/ArcMap/QGIS, VLANs/Subnets/Firewalls/VPN

EXPERIENCE

Aurat Aroma LLC — Louisville, KY

AI/ML Engineer – GenAI & Digital Transformation | June 2025 – December 2025

- Designed and built production generative AI agents and platforms using LangChain, LangGraph, AutoGen, CrewAI, and MCP servers integrating cloud LLMs (OpenAI, Claude, Gemini) with RAG pipelines, FAISS/Pinecone vector databases, and n8n workflow orchestration for enterprise automation.
- Built and maintained ETL/ELT data pipelines in Python, PySpark, and SQL on AWS/Azure/GCP processing 50K+ records from multiple sources with robust QA, encryption, OpenTelemetry monitoring, and CI/CD deployment via GitHub Actions.
- Applied advanced prompt engineering, developed reusable AI assets (prompt libraries, checklists), and built LLM-integrated automation workflows delivering ~20% operational efficiency improvement across enterprise client engagements.
- Translated complex business requirements into technical solutions, collaborated cross-functionally with engineering, product, and analytics teams, and communicated findings clearly to technical and non-technical stakeholders.
- Deployed production AI services end-to-end using Docker, Kubernetes, Terraform, and Azure/GCP/AWS with comprehensive observability via Prometheus/Grafana, maintaining audit-ready documentation throughout.

University of Toledo — Toledo, OH

Desktop Engineer | August 2024 – April 2026

- Managed 200+ enterprise endpoints across the university health system supporting EHR/EMR (Epic), PACS/AGFA imaging, PeopleSoft financials, and HL7/FHIR healthcare interoperability in hospital and clinical environments.
- Automated IT workflows using Python and PowerShell, built SQL-based reporting and Power BI dashboards for 100+ monthly operational KPIs, reducing ticket resolution time by 40% through data-driven process improvements.
- Configured enterprise networking (VLANs, subnets, firewalls, VPN) with HIPAA-aligned data security, and supported system integration across equipment and software environments in clinical settings.

University of Toledo — Toledo, OH

Transition Coach | January 2025 – May 2025

- Assisted specially-abled students with life skills, communication strategies, and community engagement, demonstrating strong interpersonal, empathy, and cross-cultural communication skills.

PROJECTS

- Synthetic Olfactory Engine — Production Multi-Agent AI Platform:** Built production multi-agent AI system using LangChain, LangGraph, AutoGen, CrewAI, and MCP servers integrating local and cloud LLMs with RAG pipelines (FAISS, Pinecone), knowledge graphs, and n8n workflow orchestration for autonomous enterprise task execution.
- GenAI Workflow Automation:** Built AI-driven enterprise automation using Python, ChatGPT API, and advanced prompt engineering for data processing, reporting, and workflow efficiency with reusable prompt libraries and AI asset management systems.
- Salary Prediction ML Model:** Developed production ML models (Linear Regression, KNN, Ridge, Lasso) in Python/Scikit-learn with feature engineering and evaluation (R^2 , RMSE) to predict salary trends from large structured datasets.
- Bitcoin Price Analysis:** Analyzed 100K+ financial transactions using SAS, Excel, and regression modeling ($R^2=0.75$) to identify key statistical drivers of price trends, delivering executive Power BI dashboard insights.
- NBA Analytics AI Agent:** LLM-powered NBA analytics agent using LangChain tools, nba_api data extraction, and Python (Pandas, Matplotlib) enabling natural language querying of basketball statistics and intelligent player performance insights.

CERTIFICATIONS

- Google Cloud Professional Data Engineer (In Progress) | Microsoft Azure AI Fundamentals AI-900 (In Progress) | Microsoft Fabric DP-600 (In Progress)
- BCG – Data Science Job Simulation (Forage) | Deloitte Technology Job Simulation (Forage)
- Introduction to Generative AI (Google Cloud) | Fundamentals of Azure AI Services (Microsoft)
- Microsoft Power Platform & Business Analysis (Microsoft) | Microsoft Office Specialist: Excel 2016 (Microsoft)
- Hypothesis Testing (Great Learning) | Machine Learning Onramp (MATLAB) | Python (Udemy) | MySQL (Udemy) | R Programming (IIT Bombay) | PostgreSQL (IIT Bombay)
